

Year 5 Homework

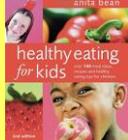

Reading Spine: Wonder Topic: Farnborough Spa

Homework activities are intended to be as open ended as possible, allowing the children to reflect on their learning in class in a creative way and for the children to make their own decisions on how to collect, record and present their home learning. We know from research that all pupils have different learning styles – some are visual learners, others work well with words and writing, many learn best from practical hands on activities e.g. through making things, art or music. We know that children’s learning is maximised when they engage in activities using their individual learning styles.

Each week your child will be expected to complete a homework grid task. They can answer the question or complete the task in their own preferred way on one or two pages in their homework book. Here are some ideas of how children might approach learning grid activities:

- Drawing, colouring, sketches, labelled diagrams, artwork- painting, collage, 3D constructions
- Cooking with photographs or explanations
- Take photographs or even videos of their work
- Use the internet as a resource
- Tables, charts and grids
- Writing fiction, poems, descriptions
- Writing non-fiction-report, diary, letter, journal, newspaper report, e mail, leaflet, debate or explanation
- Invitations, postcard
- Your child can include objects or resources or references to them.

We hope you have fun learning

Bloom's Taxonomy - levels of thinking				
	Knowing What do I know and understand?	Understanding Can I apply and show what I know?	Creating What can I create?	Evaluating Can I evaluate and make judgements?
Verbal I enjoy reading, writing and speaking 	Write your own Being Healthy poem and perform it to the class.	Carry out a chore in the house! Do the dishes, help make the dinner, make your bed etc. Work out how many steps you do when doing chores.	Create a short song to recall the Five food groups that we should eat from to have a balanced diet.	Invent a new revolutionary exercise machine. What is it called? What does it do? Who will use it? Describe what makes it better than any other machine on the market.
Creative I enjoy painting, drawing, making and listening to music 	Design an information poster with facts about the importance of exercise.	Create your own poster or sculpture using fruit, vegetables or plants inspired by Giuseppe Arcimboldo. Take a photograph to bring to school. 	Create a healthy recipe we could put in a Farnborough Spa Cookbook. 	Around London there are many different alternative sporting activities. Choose one to explore. Explain why people enjoy taking part in this alternative sporting activity.
With my family I enjoy working with others 	Research what food is eaten in space. How it has been developed over time? How does space food differ from food on earth? Can you eat it in the same way? What would be healthy food in space?	How do astronauts keep healthy in space? What happens to the body in space? What exercises do they need to do to keep fit in space?	Create a list of 10 exercises that you and your family enjoy doing. Find out how many calories you could burn if you did each exercise for half an hour.	Create a two minute warm up for the sport of your choice. Then evaluate it? What made the warm up most fun? What would you change? What would be the impact of this?
On my own I enjoy working by myself 	Choose one of your favourite meals and research where the food on your plate has come from and its journey to your plate.	Research the life of a Sporting Personality. Can you present it in an interesting way? 	Make a healthy smoothie to promote healthy living. 	How many star jumps or burpees can you do in 1 minute? Can you try this every day and beat your score? Record your results.

These activities are either linked to your English, topic or give you the opportunity to do things that really matter with family and friends at home, whether it be having fun or being responsible in your house. These tasks need to be completed to the best of your ability. If a task is colour coded in blue, then the outcome needs to be presented in your homework book; if it is shaded in yellow, then no evidence is required in the book. Homework will be collected weekly on a Tuesday. You can choose which activity to complete.
