

Subject / Lesson	Time
Maths	1 hour
Spelling Test	10 minutes
English	30 minutes
Physical Activity	30 minutes
Music	30 minutes

I would like you to try one of the three maths investigations. You can try another if you have time.

The three options are on the next three slides.

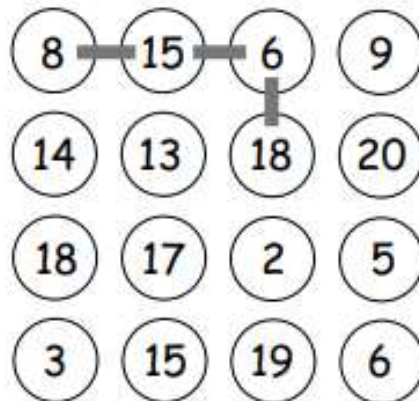

Joins

Join any four numbers.

Find their total.

Joins can go up, down or sideways, but not diagonally.

The score shown is $8 + 15 + 6 + 18 = 47$.

Find the highest possible score.

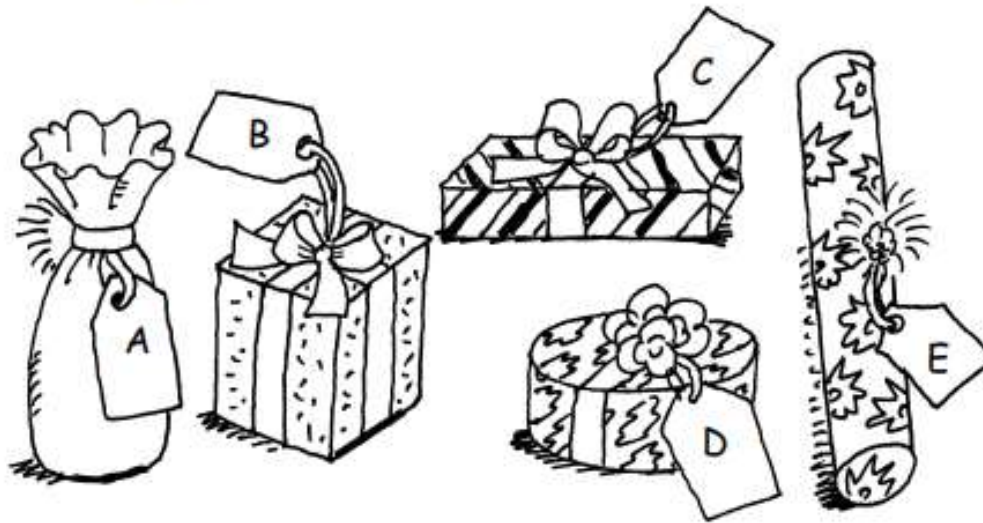

Find the lowest possible score.

Try joining five numbers.

Now try joining five numbers using only diagonal joins.

Presents

Gurmit paid £21 for five presents.

For A and B he paid a total of £6.

For B and C he paid a total of £10.

For C and D he paid a total of £7.

For D and E he paid a total of £9.

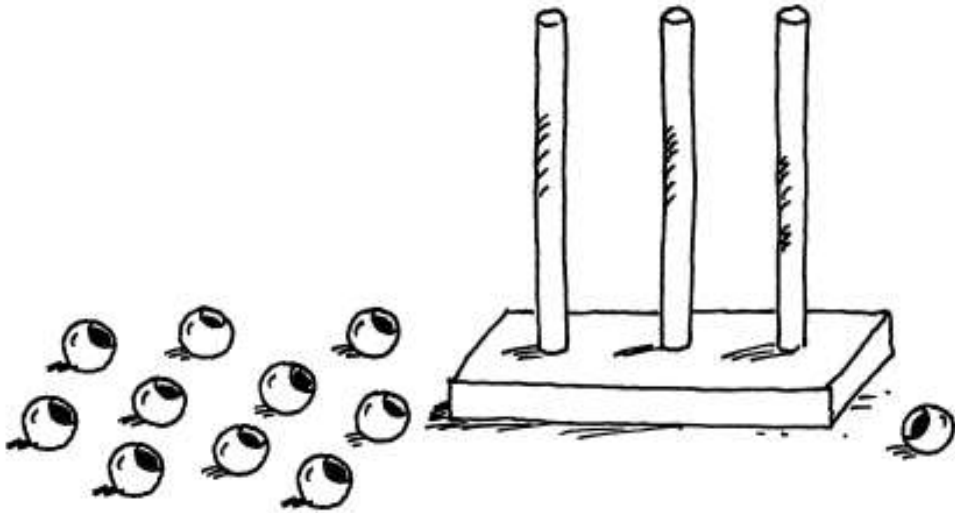

How much did Gurmit pay for each present?

Three digits

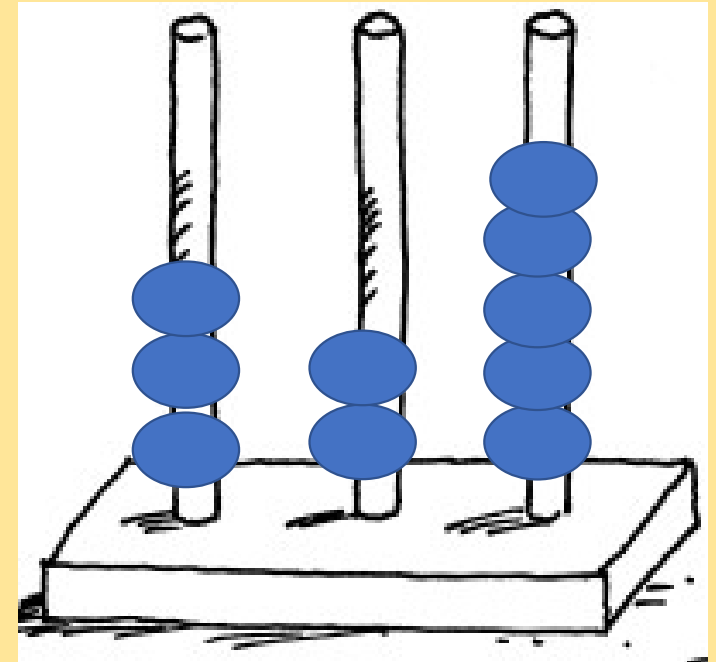

Imagine you have 25 beads.

You have to make a three-digit number on an abacus.

You must use all 25 beads for each number you make.

How many different three-digit numbers can you make?
Write them in order.

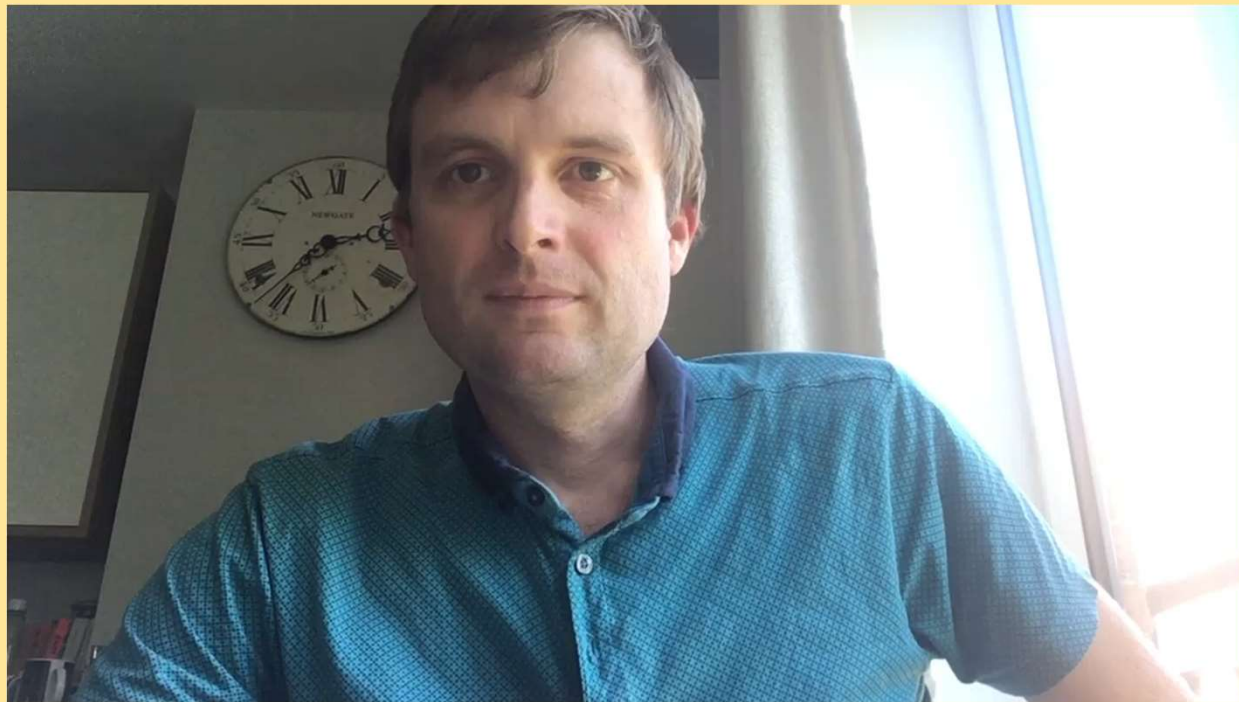

An abacus works like a place value chart. In the above example the number is 325.

Can you see why?

When you make your numbers you must use 25 beads.
