

Animals including Humans

Year One Knowledge Organiser

Key Vocabulary

Humans	Humans are animals from the mammal group.
Mammals	Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby.
Senses	Humans have 5 senses. They are touch, smell, taste, hearing and sight.
Nose	The nose is used for our sense of smell . It can tell if things smell or not nice.
Tongue	The tongue is used for our sense of taste . It can tell if something tastes bitter or sweet. You might have tastes you like or don't like.
Teeth	Teeth are for hard objects in our mouth used to break food up.
Eyes	Eyes are used to see things all around you. This is your sight .
Ears	Ears are used to hear things all around you. They can hear different sounds.
Skin	Skin gives you your sense of touch . You can tell if something is warm, smooth, rough without looking at the object.

Why are senses important to animals (including humans)?
