Dear Customer

Notification of the replacement of gas mains in Shire Lane, Farnborough

I am writing to advise you that we are planning to upgrade the gas network pipe in Shire Lane, Farnborough. The old metal gas pipes have reached the end of their life and need to be replaced with plastic pipes to allow us to ensure that we can continue to provide a safe and reliable network.

Who are we?

At SGN we replace and repair the gas pipes in your area, this means we can continue to provide a safe and reliable gas supply to your community.

What does this mean for you?

Our contractor JDT Utilities Ltd, who will be carrying out this work on your behalf are planning to start work on the 15 February 2025 for approximately 9 days.

To ensure the safety of traffic around the work site, the entire length of Shire Lane will be temporarily closed for the full 9 days.

A 'drop in' session has been arranged for Monday 3 February, between 2pm - 6pm at the Downe Village Hall, 26 High Street Downe, Downe, Orpington BR6 7UT.

This will allow the local residential and business community to see the work plan and raise any concerns.

For those unavailable to make this day, further communication will be forwarded once plans have been finalised.

Thank you for your attention to this matter. Please share this information with anyone you think may be of interest.

Your Sincerely

Harrison McIntyre
Senior Project Manager
